# Software Architecture Document

## 1. Introduction

### 1.1 Purpose

This document provides a comprehensive architectural overview of the system, using a number of different architectural views to depict different aspects of the system. It is intended to capture and convey the significant architectural decisions which have been made on the system.

### 1.2 Scope

This document contains the MVC as well as the class diagram of the project OnLib.

### 1.3 Definitions, Acronyms, and Abbreviations

n.a.

### 1.4 References

This document contains all 5 Use Case documents and SRS document.

### 1.5 Overview

[This subsection describes what the rest of the **Software Architecture Document** contains and explains how the **Software Architecture Document** is organized.]

## 2. Architectural Representation

This document shows the software architecture of OnLib.

## 3. Architectural Goals and Constraints

This document shows the software architecture of OnLib.

## 4. Use-Case View

See SRS

### 4.1 Use-Case Realizations

See Use Cases

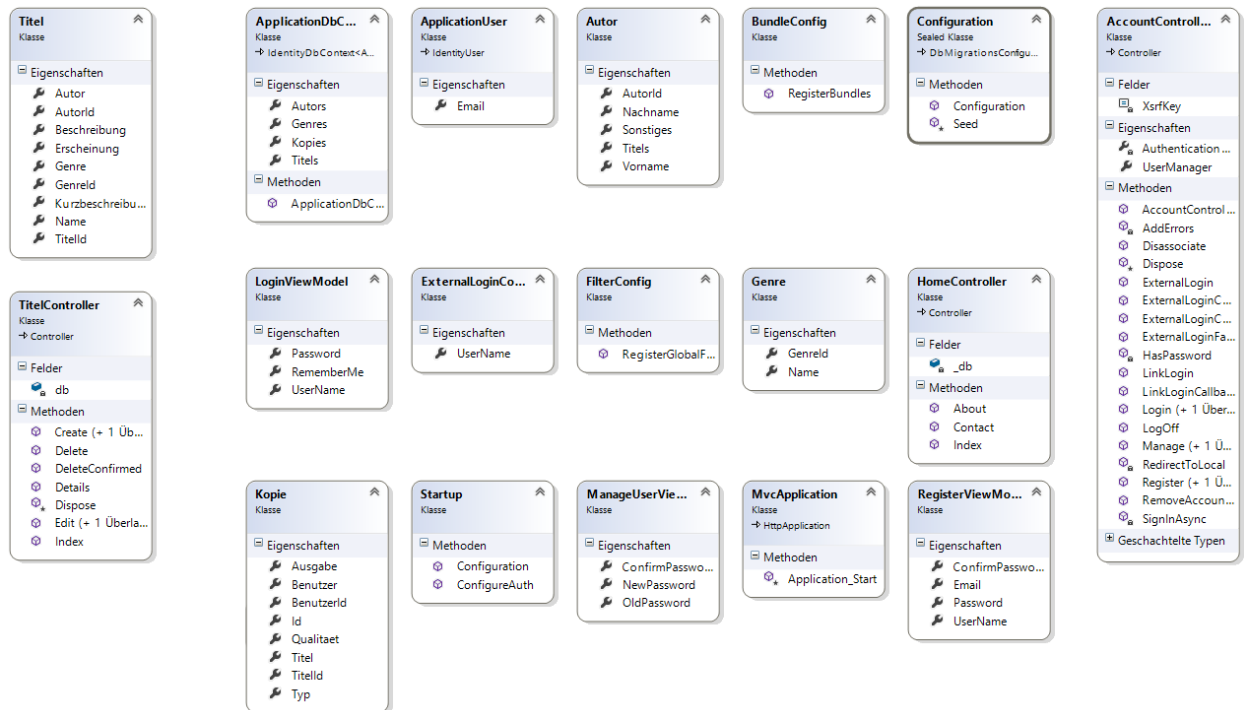

## 5. Logical View

### 5.1 Overview

Online-Library	Version: 1.0
Software Architecture Document	Date: 30/11/13
Torsten, Wanping	

## 5.2 Architecturally Significant Design Packages

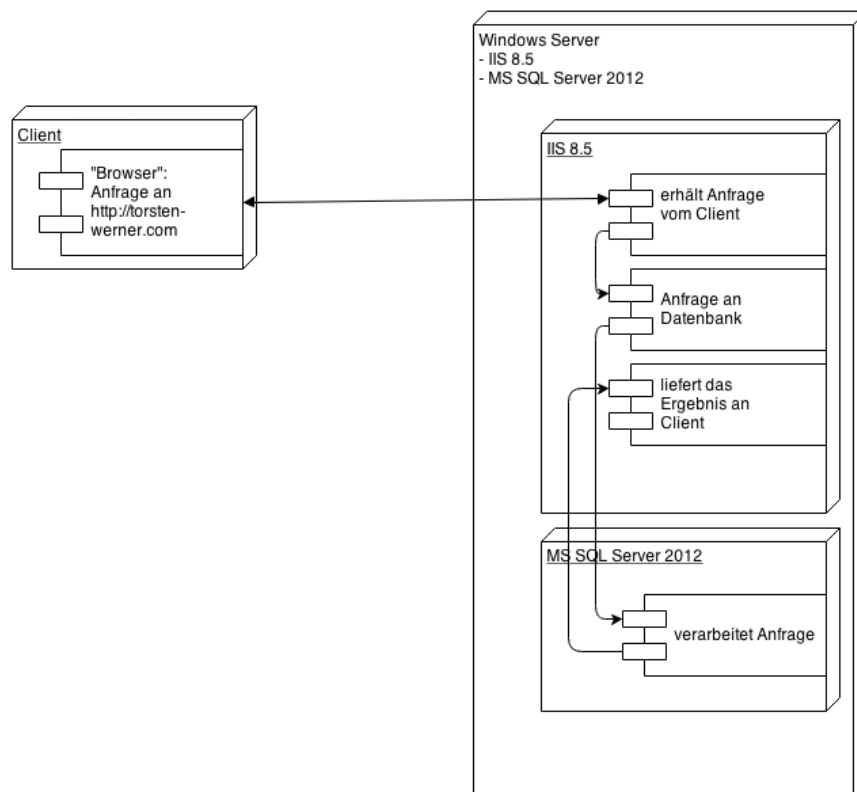

## 6. Process View

N.A.

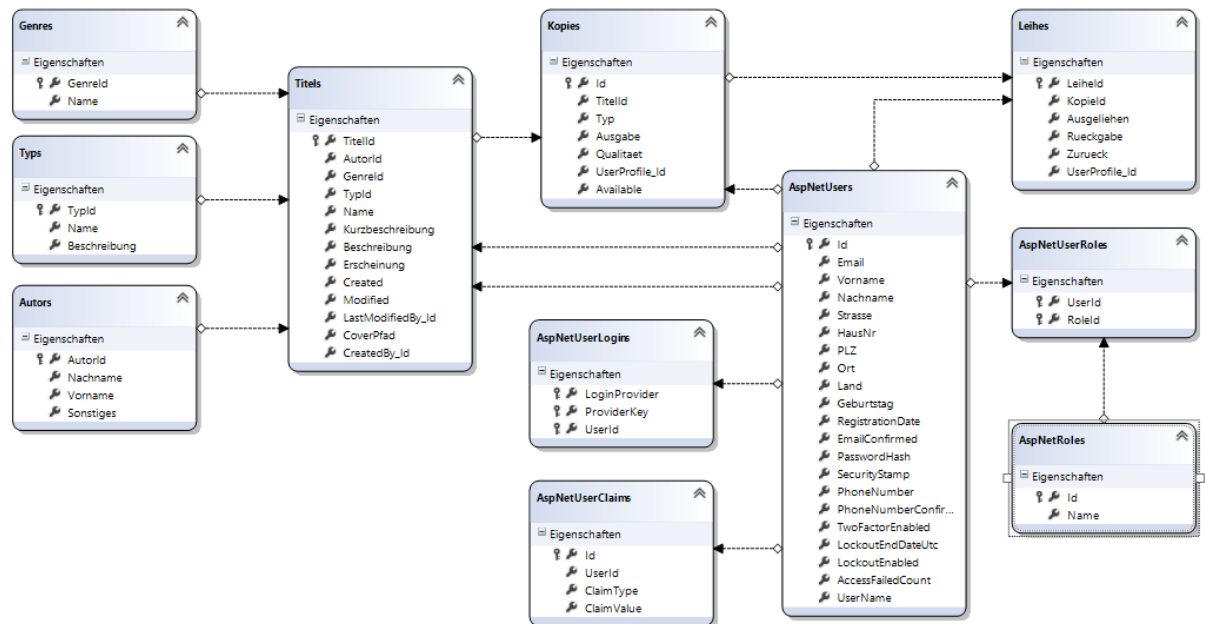

## 7. Deployment View

Online-Library	Version: 1.0
Software Architecture Document	Date: 30/11/13
Torsten, Wanping	

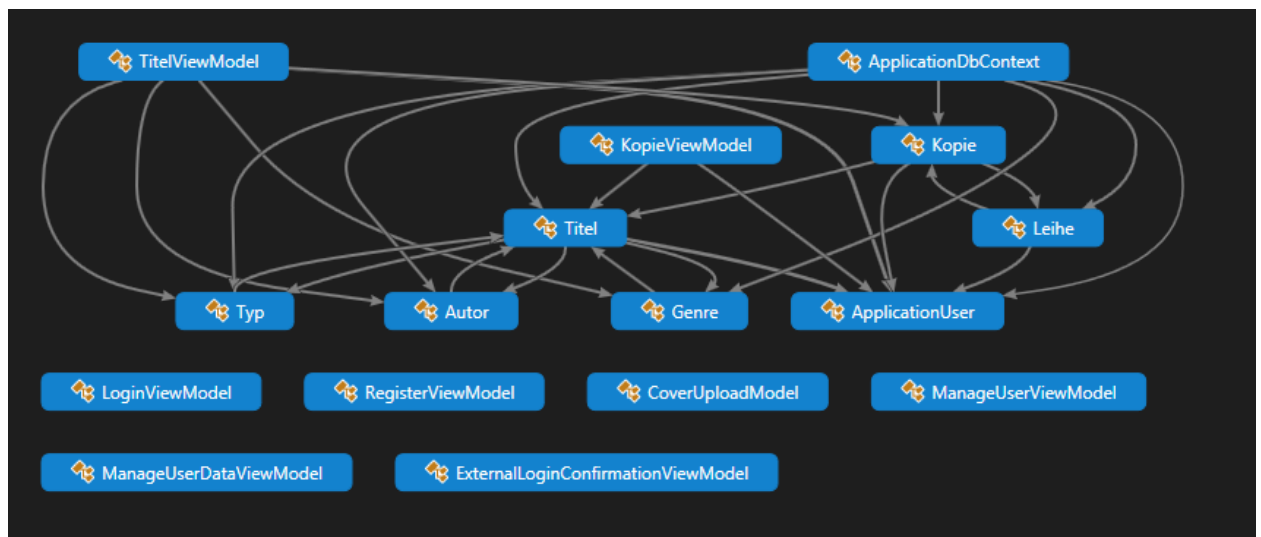

Online-Library	Version: 1.0
Software Architecture Document	Date: 30/11/13
Torsten, Wanning	

## 8. Data View (optional)

## 9. Size and Performance

The major dimensioning characteristic of the software is the convenient way to borrow books, CDs and movies. Server congestion can be the consequence of too many users. However, this problem has already been considered when setting up the server, so this page should also work with many members who are online at the same time.

## 10. Quality

The major dimensioning characteristic of the software is the convenient way to borrow books, CDs and movies. Server congestion can be the consequence of too many users. However, this problem has already been considered when setting up the server, so this page should also work with many members who are online at the same time.
