Specified Answer for: N requirement

narration

Specified Answer for: A activity diagram

Specified Answer for: S mockup

Question 4

0 out of 10 points

If you were to draw the activity diagram of a login use case, the **[M]** describes what happens if you enter correct username and password. There are usually several **[A]** that show the different paths through the activity diagram in case something goes wrong. These are very important when it comes to **[T]**.

Selected Answer: If you were to draw the activity diagram of a login use case, the **Requirements** describes what happens if you enter correct username and password. There are usually several **Testing** that show the different paths through the activity diagram in case something goes wrong. These are very important when it comes to **Alternative Path(s)**.

Question 5

10 out of 10 points

Which UML diagrams are primarily targeted at the client for purpose of communication?

Selected Answer: Activity Diagram

Question 6

5 out of 10 points

What is the main point of the system boundary in the overall use case diagram?

To show that you are not responsible for the use cases on the outside of the boundary

The use cases on the inside are the correct ones, the ones on the outside are incorrect scenarios of the use cases.

The boundary clarifies who the actors are.

Question 7

10 out of 10 points

Match these up.

Question	Selected Match
Use Case Diagram	B. Functional Diagram
Class Diagram	A. Static Diagram
Sequence Diagram	D. Dynamic Diagram
Activity Diagram	C. Functional Diagram with more Detail

Question 8

10 out of 10 points
